

AI health tech consulting: from concept to a deployed, validated solution.

Backed by active academic research in medical imaging, wearables, cardiology AI, and clinical decision support.

PHASE 1: ADVISORY

Discovery

\$5,000

- Whether AI is the right approach for your problem
- High-level recommendation of the best solution direction
- Review of relevant academic research and competing approaches
- Technical assessment of your solution's novelty*

Fully credited toward a Roadmap engagement started within 90 days.

Roadmap

\$12,500

- Precise definition of the AI task and success criteria
- Data requirements: what you need, review of what you have
- Identification of public datasets that can accelerate development
- Step-by-step development plan with milestones, risks, and cost estimates
- Regulatory considerations (e.g., whether your product may qualify as Software as a Medical Device)

Build

\$60K–\$180K

- Data cleaning, preprocessing, and model development
- Rigorous validation
- You receive a documented, working model

Integrate

\$80K–\$250K

- Everything in Build
- Embedding the model into your product or pipeline
- Applied research support for generalization, edge cases, workflow fit

Co-Develop

Custom Quote

- End-to-end ownership: raw data through deployed, validated solution
- Embedded in your product
- One accountable team, so you're not juggling vendors

Fixed-fee engagements, scoped from your Roadmap. Minimum engagement \$50,000.

Model Monitoring & Maintenance

from \$4,000/mo

- Performance monitoring and drift detection
- Retraining and reporting for models we've delivered

Health AI models degrade over time. We make sure yours doesn't.

Fractional AI Scientific Advisor

from \$6,000/mo

- Senior academic AI expertise embedded in your team
- Strategy, architecture review, research direction, technical due diligence

For a fixed number of hours per month.

ADD-ON SERVICES

Regulatory & validation strategy (SaMD assessment, validation study design)	from \$7,500
Patent application technical support (you engage patent counsel; we provide the technical depth)	\$10,000
Publication support: study design, analysis, and manuscript development for peer-reviewed venues	from \$20,000
NIH/SBIR grant support: brainstorming & strategy	\$2,500
NIH/SBIR grant support: proposal review	\$2,500
NIH/SBIR grant support: proposal writing participation	\$4,000
Named consultant on your funded project	\$5,000 at proposal + budgeted grant costs

Grant-support fees are never contingent on award. Publication authorship follows standard academic (ICMJE) criteria, with our engagement disclosed.

Terms at a Glance

- Fixed-fee engagements: 50% at start, 50% at delivery; changes handled by written change order
- You own all project deliverables; we retain our pre-existing tools and methods
- We deliver research-grade models and validation documentation; product deployment, regulatory clearance, and clinical use remain the client's responsibility
- *Novelty and technical assessments are academic opinions, not legal opinions on patentability or freedom to operate
